

Custom Software Development

Renprotech Solutions LLC offers development of engineering software, apps, and process automation intended to meet customers' unique demands. We deliver successful solutions that accord with all the specified requirements while invariably staying within **time** and **budget limits**.

DEVELOPMENT PROCESS

With a serious and regardful attitude towards your business, we start from the point of concept examination: We carefully analyze your needs and help you create a **detailed software requirements specification**, which is indispensable for implementing the project the way you envision it. We offer two most common and effective development methodologies.

TECHNOLOGIES

We master all levels of software complexity and provide quality solutions on the following technologies:

- **Data Analytics:** Python
- **Back end and desktop:** Python, .NET, Java, PHP, Node.js, C++
- **Frontend:** HTML5, CSS3, JS
- **Databases:** Microsoft SQL Server, MySQL, Oracle, SQL Azure, PostgreSQL, MongoDB

COOPERATION MODELS

This is how we can pitch in:

FULL CYCLE PRODUCT
DEVELOPMENT

SPECIFIC OR STANDALONE
FUNCTIONALITY DEVELOPMENT

TEAM
AUGMENTATION

- **Full cycle product development:** you provide a specification or a dedicated Product Sponsor, and we build the software from the ground up.
- **Specific or standalone functionality development:** to help you extend the offering, we create additional features or applications for your product which require certain development skills – for example, a mobile version, BI tool and so on.
